

Your Becker dealer

Becker Traffic Pro

[Navigation system, CD and radio in one unit]

High-tech enjoyment.

Attending important business meetings or looking forward to driving to your holiday destination? Then just get in the car and experience Becker's pioneering technology with the Becker Traffic Pro. A fascinating combination of a navigation system, CD player and 2-RDS tuner in one unit, offering the latest information technology as well as a brilliant sound quality and you will notice right away: You have never been driving this safely and

relaxed. Never before has arriving been so much fun. You just input where you want to drive to and a friendly voice guides you to your destination along the best route. Everywhere and anywhere in 18 European countries. Using only one navigation CD. Even traffic hold-ups received via the TMC* traffic information channel are directly evaluated by the route guidance system. Best of all: An excellent car hi-fi system plays all your favourite tunes during the entire journey. The Becker Traffic Pro. A new dimension of mobility.

*Dynamic route guidance with TMC currently only works in Germany, Holland, Northern Italy and Switzerland.

Already heard?

The Becker Traffic Pro offers exceptional radio quality with impressive bass levels and optimum tuning precision as well as an outstanding 2 RDS tuner reception, allowing you to listen to your favourite programs using the best available FM frequency – whilst you remain blissfully unaware of any frequency change. All programs available at the time are automatically stored and shown on the display via the Dynamic Auto Store function. The desired radio program can then be easily selected via the softkeys.

Sounds good.

The Becker Traffic Pro CD player takes good care of your CDs. A sensitive scratchproof mechanism ensures that your CDs' scratchable mirror surface is not touched but that they are carefully held by their outer edge. At the same time, a particularly sturdy, shockproof CD drive ensures that you can enjoy listening to your music irrespective of the road condition. So whilst being guided safely to your destination, you can enjoy the excellent sound you are used to from a Becker car hi-fi-system.

Safely to your destination.

Precise route guidance and perfect CD enjoyment in one: the GPS satellite receiver allows the Becker Traffic pro navigation system to always know your exact position. A female or male voice will reliably inform you about the best possible route to your destination. That does not mean that you have to go without your favourite music: Once the best possible route has been calculated, you can remove the navigation CD and the CD player is ready to play music CDs until you arrive.

One for all.

The Becker Traffic Pro requires only one navigation CD to reliably guide you through Germany, Austria, Switzerland, Liechtenstein, France, Spain, Italy, Denmark, Sweden, the UK, Belgium, Luxembourg, Holland, Monaco, Andorra, the Vatican City, San Marino and Portugal. It also offers you the option to store 50 fixed destinations or to call up one of your 50 most recent destinations. It's as easy as that.

Digital information.

Our TMC technology will ensure that you are on the right route anywhere in the country. TMC* stands for Traffic Message Channel, an additional traffic information channel, transmitting the latest traffic information as an RDS signal – from radio transmitters along your route, directly to your car. Digital, inaudible and independent from any travel news transmission times of your selected radio programme. Providing you with the best possible information at all times of the day, and informing your navigation system that recalculates your route in case of any traffic hold-ups. Or keeps to the original route if following a diversion would take too long.*

One push of the button and the flip-down display of the Becker Traffic Pro opens. You can now easily insert the navigation CD and music CDs.

*Dynamic route guidance with TMC currently only works in Germany, Holland, Northern Italy and Switzerland.

Everything is under control.

The Becker TrafPc Pro offers superior technology that is easily controlled via a transparent, cleverly thought out menu system, and a particularly user-friendly operating unit, allowing all functions to be easily controlled via practical rotary buttons and comfortable softkeys. You will see for yourself: already inputting the target address is amazingly simple. After entering only a few letters a list of the most logical town and street names appears in the display at the push of a button. You only have to confirm the right names - a truly easy to control system. Once the destination has been

entered, the double speed CD drive transfers the required route guidance data from the navigation CD to an 8 MB ROM. The CD player will then be free to play audio CDs for the entire journey, and when you receive driving directions whilst you are listening to music, the hifi system automatically reduces the volume for a moment. Precisely to the pre-selected volume level. Offering a fascinating driving comfort that meets even the highest requirements. By Becker.

Anything else?

Special destinations such as petrol stations, stations or airports are also available after pressing a few keys. Even their phone number is provided. You do, however, still have to call them or drive to them yourself.

At a glance.

At a glance, the Becker Traffic Pro display provides all the information you need. The DOT matrix display shows all route recommendations. The display also provides all relevant CD player and car radio information: CD play time, title number, time, station name and much more. In positive or negative display mode, as you wish.

Have a change.

The Becker Traffic Pro is easily connected to the Becker Silverstone 6x or 10x CD changer. Pull out all the stops and compile your own personal charts. In a matter of seconds, providing hours of enjoyable listening. Or do you prefer surprises? The Becker Silverstone can also function as your personal DJ, providing you with a newly compiled music program on every journey.

Technical features of the Becker Traffic Pro:

- Destination input via rotary button
- Choice of eleven languages, choice of female/male voice
- Display with positive/negative display mode
- 50 fixed and 50 most recent destinations can be stored in the destination memory
- Settable route options
- Input of street numbers and crossroads
- Special destinations (i.e. airports)
- Calculation and display of estimated time of arrival
- Automatic recalculation of route in case of deviation from the originally route
- Automatic change-over from summer/winter tyres
- Dynamic traffic guidance with TMC* technology

[Want to have a test drive?
Then fasten your seat belt.]

The Becker Traffic Pro can be easily controlled via the rotary button and softkeys.

Upon pressing a button, a list of possible destinations and roads is displayed. You only have to make a selection.

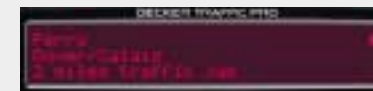

Clever function: When entering a destination, only letters that make sense at that specific position are displayed.

How do you want to get to your destination? Do you want to take the quickest route or do you want to avoid motorways. Select your individual route.

Once your route has been calculated, a friendly voice tells you in good time, where you have to turn off next.

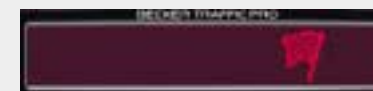

All current traffic hold-ups received via the Traffic Message Channel, are automatically incorporated in the navigation system.

Becker Traffic Pro guides you directly to many important special destinations, such as petrol stations, railway stations or airports.

The info controller tells you exactly how far you still have to drive and when you are going to arrive.

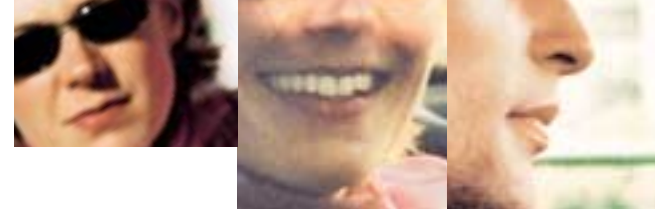

When the destination flag shows up on the display, you have reached your destination.

*Dynamic route guidance with TMC currently only works in Germany, Holland, Northern Italy and Switzerland.

The choice is yours.

*Female or male voice?
As you wish.*

Unmatched individuality:

The Becker Traffic Pro allows you to create your own individual environment. And to liven up your car.

The quickest or shortest route? Do you want to avoid certain road types on your journey in order, for instance, not to have to pay any motorway tolls? You can use a varied choice of practical route options, enjoy the freedom of arranging your journey just how you like it and even if you leave the recommended route, the Becker Traffic Pro has stored enough data to safely return you to the best possible route. We have also provided a comprehensive menu of special destinations, allowing you, i.e., to quickly locate a petrol station or the nearest airport. But that's not all. By pressing a button you will receive helpful details about your current journey. The average speed, the distance remaining to your destination or your estimated time of arrival. Any questions?

[Becker Traffic Pro D technical features]

NAVIGATION
